WE ARE ALWAYS ON THE MOVE, AND YOU?

BY RAMOS&BASSOLS

Wing is a creation from the studio Ramos & Bassols for Actiu, the result of the natural technological evolution of a traditional wooden chair, adapted to more efficient production processes and highly innovative technical developments, carried out at the Actiu Technology Park facilities.

It is a piece of proportioned and balanced shapes, light but robust, balanced sizes, with comfortable geometry and a backrest that wraps around the traditional wooden seat. It is a piece that elegantly fuses technology and tradition. The result is a unique chair but easily assimilable, making it easy to adapt to a multitude of spaces.

NATURAL TECHNOLOGICAL EVOLUTION OF A TRADITIONAL WOODEN CHAIR

The new collective chair Wing, with a vintage style design, is useful for any environment, both indoor and outdoors, responding to the technical and aesthetics needs of the new trends for collective office furniture, thanks to its design, colour, finishes and accessories.
