

nautica  
mut design, 2012

[en] “*Nautica* is a hanging seat that pays homage to one of the first pieces produced by Expormim in the 70’s. Our commitment to the creation of a unique design that would recover and rethink the traditional use of rattan was matched by the will of delivering something different, unexpected. Natural world is filled with contrasts we tried to evoke through a delicate and ever-changing game of shadows that brings to mind the reflections of light upon sea waves. Strong and resistant, while visually lightweight, the swing blends easily into any environment, either suspended from a tree branch or from its self-supporting structure.”
