How to code a reference

- 1

At the beginning of the coding and price tables of our price list, you will find the available models and their prices, as well as the basic reference of the product.
- 2

The system is designed to code vertically, adding desired components to the product by selecting the reference digits. Creating a correlation that will form the final order reference.
- 3

The finishes of arms, bases, optional complements, supports and upholstery will be shown in different colors so that the location of their reference and price is intuitive.
- 4

At the end of each table we will have legends or informative notes about the product being offered. Please read carefully to avoid confusion or mistakes when ordering.
